Scenario Description:

The user needs to be able to access the Surgeon login, Administrator login, and diagnostics applications directly from the Start screen.

The Start screen needs to be reorganized to incorporate the following changes:

1. Remove the Hip 7 VM icon as we will no longer support this application.
2. Add an "Administrator" button to take the user to the Administrator login screen.
3. Add a "Diagnostics" button to take the user to the diagnostics applications.

The Start button (Knee icon) will take the user directly to the surgeon login screen, where they can see the available surgeon accounts on the system.

Definition of Done:

Hip 7 icon is removed

Administrator button is added

Diagnostics button is added

Testing Strategy: Not added

Tools Used: N/A

Admin Login

<p>Scenario Description: The user needs to be able to access the Surgeon login, Administrator login, and diagnostics applications directly from the Start screen.</p> <p>The Start screen needs to be reorganized to incorporate the following changes:</p> <ol style="list-style-type: none">1.
