Scenario Type	Scenario
Positive	Navigate to Import Reference Files screen via Admin Login --> Verify all elements (table, scroll bar, quit button, import button, import progress bar, cancel button, remove button, shape -size) match with other admin screen and present on Import Reference File screen
Positive	Navigate to the Import Reference Files screen via Admin Login --> Import more than 15 list of reference files in cori --> Verify the vertical scroll feature on Import Reference File state from top to bottom and bottom to top using tablet and monitor
Positive	Navigate to the Import Reference Files screen via Admin Login --> Verify the vertical scroll feature after click on Select All checkboxes to select all reference files
Positive	Navigate to the Import Reference Files screen via Admin Login --> Verify the date format yyyy-mm-dd (matching other date formats in Admin screen)
Positive	Navigate to the Import Reference Files screen via Admin Login --> Verify the table functionality (selection) using tablet
Positive	Navigate to the Import Reference Files screen via Admin Login --> Verify the table functionality (selection) using monitor and tablet both to select the 100 reference files
Positive	Navigate to the Import Reference Files screen via Admin Login --> Import 16 reference files(consist of only alpha characters, numeric characters, start with alpha, start with numeric, end with numeric, combination of alphanumeric) in the cori --> Verify the table functionality (sort) using tablet and monitor in alphanumeric order
Boundary Analysis	Navigate to the Import Reference Files screen via Admin Login --> Import 2 reference names ended with numeric characters A0 or B1 are imported in the Cori --> Verify the table functionality (sort) using tablet and monitor in alphanumeric order
Boundary Analysis	Navigate to the Import Reference Files screen via Admin Login --> Import 2 reference names started with numeric characters 0AA or 0BB are imported in the Cori --> Verify the table functionality (sort) using tablet and monitor in alphanumeric order
Boundary Analysis	Navigate to the Import Reference Files screen via Admin Login --> Import the reference files --> Verify the table functionality sorting via date using the monitor
Positive	Navigate to the Import Reference Files screen via Admin Login --> Import 16 reference files in the cori --> Verify the table functionality (scroll) using tablet and monitor in alphanumeric order
Negative	Navigate to the Import Reference Files screen via Admin Login --> Import reference files in the cori --> Verify the table functionality sorting via current date using tablet
Negative	Navigate to the Import Reference Files screen via Admin Login --> Import reference files in the cori --> Verify the table functionality sorting via oldest date using tablet
Positive	Navigate to the Import Reference Files screen via Admin Login --> Import the reference files --> Verify the status bar displayed on Import Reference File Screen
Combination Testing	Navigate to the Import Reference Files screen via Admin Login --> Import 1 reference file name with 00000 --> Verify the table functionality (sort) using tablet and monitor in numeric order
Negative	Navigate to the Import Reference Files screen via Admin Login --> Import 15 reference files in the cori --> Verify the table functionality (scroll) using tablet and monitor in alphanumeric order
Combination Testing	File with numeric character 00000 already present in cori--> Navigate to the Import Reference Files screen via Admin Login --> Import 1 reference name with AAAAA --> Verify the table functionality (sort) using tablet and monitor in alphanumeric order
